FOR IMMEDIATE RELEASE

Western Electrical Contractors Association (WECA)
Celebrates Third Annual Low Voltage Week With Two Open Houses
Open Houses Provide First-Hand Look at Opportunities for Low Volt Technicians

Rancho Cordova, CA. March 2018. The Western Electrical Contractors Association, Inc., (WECA), a California-based trade association supporting the electrical and low voltage industries, is holding a **Low Voltage Apprenticeship Training Open House** on March 20, 2018, at their WECA headquarters in Rancho Cordova, and on March 21, 2018, at their San Diego Training Facility, from 10:00 a.m. to 12:00 p.m. at each location.

California needs skilled workers. Trades industry learning and networking events have never been more crucial than now, when jobs are going unfilled. With every five workers leaving the trades, only one replacement is supplied by Apprenticeship programs. The demand for low voltage technicians, in particular, is at an all-time high.

WECA is addressing this set of circumstances by offering a unique opportunity for prospective apprentices to learn about the industry first-hand, through two Open House events this month. Prospective apprentices can meet instructors, tour the learning labs, participate in hands-on demonstrations simulating scenarios found in the field, and ask questions in an open forum. The day will culminate with an application session when interested candidates may apply to the Apprenticeship program immediately. Qualified applicants may quickly find themselves placed with a sponsoring low voltage contractor, well on their way to a lucrative career as they enjoy paid on-the-job training.

WECA's well-regarded, federal and state-approved Apprenticeship programs offer industry contractors vetted and educated apprentices who are adept in not only navigating the Code, but also experienced with real-industry scenarios, via WECA's extensive hands-on labs.

Upon graduation, apprentices already have substantial experience in low voltage specialty fields like Voice Data Video and Fire Life Safety, and many stay on with the same companies who trained and developed them on the job, during their apprenticeship.

REGISTRATION. Pre-registration for this event is encouraged.
