

# THREE WAYS TO TAKE WECA GETWIRED

## Design the journey to an Electrician Trainee Program Certificate that works for YOU

Switch it up any time! You can move from instructor-led for one course to self-paced the next; in-person lab this quarter and online interactive lab next quarter: mix and match from class to class to best fit your life at that point in time! Successful completion of any GetWired classes in any format count equally towards your program certificate.

### OPTION 1 **GetWired Online Instructor-Led with ONSITE IN-PERSON LAB**

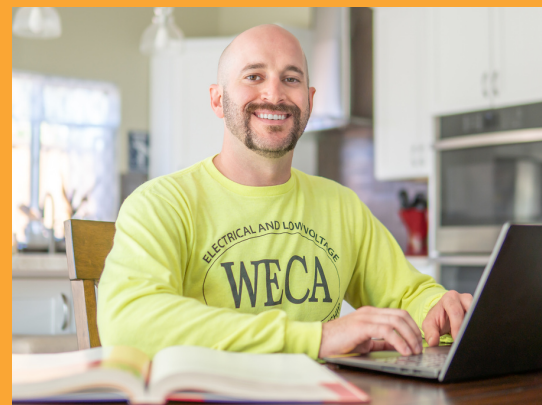

You could call this option "Get Wired Classic." Attend most of your class sessions from home, online, at a scheduled time with a live instructor; usually two evenings a week. Then attend one hands-on lab on a Saturday at the training facility closest to you! (Onsite labs begin with GetWired! 102.)

### OPTION 2 **GetWired Online Instructor-Led with ONLINE INTERACTIVE LAB EXPERIENCE**

New for 2023! Attend all of your class sessions from home, online, at a scheduled time with a live instructor; usually two evenings a week. On one of these evenings, your instructor will lead you through an online interactive lab experience, covering the same concepts as the onsite lab option.

### OPTION 3 **GetWired ONLINE SELF-PACED**

Take all of your class sessions from home, online, on your own time, at your own pace! One of the lessons will be an online interactive lab experience, covering the same concepts as the onsite lab option. An instructor is always available by email for questions.

WECA GetWired is designed to be flexible and accessible for electrical students across California.

Apply what you're learning as you build hands-on skills on the job site.
