

The Roadmap to an Electrician Trainee Program Certificate from WECA

- 💡 The chart above shows which classes you need to take to earn your certificate. Attend online, instructor-led classes (typically 2 nights per week), and onsite electrical labs (typically one Saturday per class).
- 💡 Work in the trade and gain the required on-the-job experience while you complete WECA's ET course path.
- 💡 By completing your electrical education with WECA, as well as the required on-the-job hours, you will qualify to take the California electrician certification exam.
- 💡 The courses listed above must be completed with a "pass" designation, and at least 600 course hrs completed (based on a goal of successfully completing 150 hrs per year) to be awarded the Electrician Trainee Program Certificate. Supplemental courses are available. Call the WECA office at 1-877-444-9322 for more information.

Want More?... Students can opt to continue their learning, and earn the Advanced Electrician Trainee Program Certificate.

If all the 5 electives below are passed, in addition to the requirements for the Electrician Trainee Program Certificate, a student will be awarded the Advanced Electrician Trainee Program Certificate.

Course	Type	Order
Mike Holt Limited Energy and Communication Systems	Home-Study DVD	Can be taken anytime after completing the Advanced GET WIRED! 300 series.
Mike Holt Understanding NEC Requirements for Solar Photovoltaic Systems	Home-Study DVD	Can be taken anytime after completing the Advanced GET WIRED! 300 series.
OSHA 30 Construction	Self-Paced Online	Can be taken anytime after completing the Advanced GET WIRED! 300 series.
Troubleshooting Control Circuits	Self-Paced Online	Can be taken anytime after completing BMC 1, 2, and GW 402.
Troubleshooting PLC (Programmable Logic Controller) Circuits	Self-Paced Online	Can be taken anytime after completing BMC 1, 2, GW 402, and Troubleshooting Control Circuits.
