FOR IMMEDIATE RELEASE

**Western Electrical Contractors Association (WECA)
Announces Release of the online Voice Data Video Exam Preparation Course**
*WECA's comprehensive, online self-paced VDV Exam Prep Course for California
debuts.*

Rancho Cordova, CA. August 28, 2018. The Western Electrical Contractors Association, Inc., (WECA), a California-based trade association supporting the electrical and low voltage industries, has unveiled its newest online course— Voice Data Video Exam Preparation.

This 32-hour, self-paced course is geared toward experienced students who are interested in studying for the California Voice Data Video Technician Certification exam at their own pace. The class utilizes informative presentations and sample tests to help guide students through preparing for the VDV certification exam. Students will be instructed in methods for finding the answers to any exam question, improving their exam-taking speed, and gaining an overall greater understanding of their field through lessons focused on the NFPA 70, Ohms Law, Kirchhoff's Law, foundations of signal transmission, fiber optic theory, CCTV systems, audio theory, intrusion detection, and access control, among others.

WECA Curriculum Development Manager Tom Thompson has designed the course to effectively teach students the proper methods and practices to successfully pass the VDV certification exam. Thompson explains, "There are no other online courses on the market today that match the breadth and depth of this program. It not only covers all the topics included in the test, but it goes deeply into the relevant details of each system. It even teaches students how to quickly find answers to code questions using the NEC and familiarizes students with the terminology used in Low Voltage reference manuals."

Please visit our site for more information or to enroll in the online [Voice Data Video Exam Preparation Course](#).
